FARHAD GHAEMIAN

PERSONAL NOTE

I was charmed with the magic of art from the childhood. Taking my phantasms to the outer part of the childish tender world, theater stages and silver screens of cinema was so dreamy for me. Family encouragement and the support of my older brothers made me learn drama, and this worthy art adjoined me to the world of cinema. It began by watching more and more movies, making 8mm and 16mm films, challenging with camera, directing short movies, editing, announcing on radio and TV, producing films, and after all acting.

Now, after many years, I still think about those phantasms to the outer part of the childish world... and it is just the memory of my dearest one in the world which makes my appearance in this magical arena looks sweet: the image and remembrance of my mother who was my only teacher in life.
